Experience

Software Developer

2025 – Present

OneTouch Health

São Paulo, BR – Remote

- Architected and launched a multi-tenant carer platform (API + React app), handling **2,000 real-time scheduling events/min** across **1,000–2,000 active users**.
- Optimized queries on **10M+ row tables** using indexing and query refactoring, **reducing execution time from minutes to <2s**.
- Identified excessive re-renders in React and implemented memoization and request deduplication, eliminating **50–100 unnecessary API calls/min** and reducing backend load by **~60%**.
- Mentored **10+ engineers** through structured onboarding, documentation, and code reviews, reducing ramp-up time from **~2 weeks to 3–4 days**.
- Owned production stability, resolving **50+ incidents** and implementing fixes that reduced weekly escalations by **~50%**.

Junior Software Developer

2022 – 2024

OneTouch Health

São Paulo, BR – Remote

- Led migration of legacy PHP/jQuery monolith to Laravel + React, modernizing architecture and reducing page load times from **5–10 min to <5s**.
- Delivered **100+ production features** in React, improving user workflows across a multi-tenant platform and maintaining pixel-perfect UI consistency.
- Developed automated reporting pipelines (SQL + backend APIs) used by **20+ clients**, saving **5–10 hours/week per client** and eliminating manual data processing.
