Skills

Programming: TypeScript, JavaScript, Python, Go, C++, PHP

Frontend: React, Next.js, Tailwind CSS, MUI, Chakra UI, React Native

Backend: Node.js, Laravel, REST APIs, WebSockets, Redis

Databases: MySQL, PostgreSQL, MongoDB

Infra & Tools: Docker, NGINX, AWS (EC2, S3, RDS, Lambda), Firebase, Git, Vercel

Experience

Software Developer

2025 – Present

OneTouch Health

São Paulo, BR – Remote

- Designed and implemented the **first version of the carer-facing API and React app** across **50+ client companies** — architected and shipped to production, processing up to **2,000 real-time scheduling events per minute** across **1,000–2,000 active carers**.
- Resolved critical performance bottlenecks on tables exceeding **10 million rows**, cutting query execution **from minutes to under 2 seconds** and enabling **20,000+ users** to reliably access daily dashboards and reports.
- Eliminated **50–100 redundant API calls per minute** caused by unguarded frontend re-renders, reducing server load by **~60%**.
- Mentored and onboarded 10+ developers**, producing internal technical references and conducting 1-on-1 code reviews that reduced onboarding time **from ~2 weeks to 3–4 days**.
- Diagnosed and resolved **50+ production incidents**, cutting weekly support escalations by **~50%**.

Junior Software Developer

2022 – 2024

OneTouch Health

São Paulo, BR – Remote

- Owned the full migration of legacy PHP/HTML/jQuery systems to Laravel and React across **50+ client companies**, cutting the slowest page loads **from 1–2 minutes to under 5 seconds** and retiring **5+ years** of accumulated maintenance debt.
- Drove end-to-end feature delivery as the **primary frontend developer**, shipping **100+ features** in React with Tailwind and MUI at pixel-level fidelity.
- Built data analysis reports adopted by **20+ clients**, saving each **5–10 hours of manual reporting per week** and resolving **100+ bugs** that had been blocking daily operations.

Open Source

ImprovedTube

github.com/code-charity/youtube

Chrome Extension 400,000+ active users

- Shipped **2 merged PRs** adding feature improvements and UI enhancements to one of the most widely used open-source YouTube extensions, directly impacting **400,000+ active users**.
- Collaborated with maintainers on code reviews and resolved issues affecting core extension functionality.

Rosindex

github.com/ros-infrastructure/rosindex

ROS Index

- Achieved **100% error reporting coverage** by implementing structured GitHub issue forms, streamlining bug triage, reducing tracker noise, and **directly contributed to resolving 200+ issues..**

Languages

Portuguese — Native | English — Fluent

Education

Bachelor of Software Engineering — PUC, Campinas, Brazil

2022 – 2025

Aerospace Engineering — IST, Lisbon, Portugal

2020 – 2022

Technician in Software Development — Unicamp, Brazil

2016 – 2018
